

SEEEP PhD Summer School 2024

Energy System Transformation: The Impact of Electrification

19-30 August 2024

KTH Stockholm Sweden | TU/e Eindhoven Netherlands

The yearly 2-week Energy PhD school organized by KTH Stockholm and TU Eindhoven will take place between 19 and 30 August 2022. The theme of the PhD school this year is

"Energy System Transformation: The Impact of Electrification"

Students will have a schedule with lectures and project work in an international working environment where students from European Universities as well as Chinese Universities will participate. Selected lectures will be given by expert Professors from Shanghai Jiao Tong University, Zhejiang University, KTH Royal Institute of Technology and TU Eindhoven on topics encompassing resilient production and storage, renewable energy technology, sustainability, energy demand flexibility and energy grids and conversion. CLUSTER students are eligible to apply to the Summer School. Students will be selected based on their application. There is a maximum of 25 EU students. Housing in Stockholm and Eindhoven is provided, but

you have to arrange your own travel and meals. Please upload your application no later than **May 31st**, 2024 to following contact address, yujin987215@sjtu.edu.cn

Outcome of the selection is due **June 15**, 2024

Hope to see this year!

Prof. Björn Laumert | KTH
Prof. David Smeulders | TU/e
Prof. Yanjun Dai | SJTU
Prof. Zitao Yu | ZJU
